DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 9-15, drawn to smoking article.

Group II, claim(s) 16-19, drawn to a method of producing a smoking article.

Group III, claim(s) 20-23, drawn to hand-rolling smoking kit.

The inventions listed as Groups I to III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common special technical feature of a smoking tobacco comprising shredded tobacco and reconstituted tobacco containing activated carbon, having a wrapper of 20 or greater C.U is shown to be obvious over Hedge (US 3805803) in view of Bowen et al (US 6286516). Hedge discloses the claimed tobacco mixture as shown in example 2. Additionally Hedge does not disclose the permeability of the wrapper around the tobacco rod. However, the claimed permeability is widely known in the tobacco art. As disclosed by Bowen, wrappers for tobacco rods have a permeability of

5 to 50 Coresta units. Consequently, unity of invention is lacking for among claims 9-23, as sharing a special technical feature that fails to contribute to the prior art.

A telephone call was made to Douglass R. Hamrick on 10/2/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
